DELHI OCCASIONAL TABLE

The Delhi Occasional Table was one of the first tables we made is a work of architecture all by itself. the concept of the circle, square and triangle in a side table was first seen in Lutyens's magnificent Bois des Moutiers in Normandy. That was a truly Arts & Crafts piece, in this case classical language abounds. The triangular base with moulded legs comprises three hopes set in squares, all beneath a circular top with three leaves that drop down the sides of the base or sit resting on the points of the triangle. A feat of geometric design
